

OpenText EnCase Forensic

The industry gold standard for scanning, searching, collecting and securing forensic data for internal investigations and law enforcement

 **Reliable acquisition** of evidence

 **Deep forensic analysis**

 **Mobile collection** for 27,000-plus profiles

 **Broad OS/decryption support**

For digital investigations, examiners need to be able to prioritize, collect and decrypt evidence from a wide variety of devices while maintaining its integrity. The process needs to be quick, efficient, repeatable and defensible, with the ability to create intuitive reports.

OpenText™ EnCase™ Forensic is recognized globally as the gold standard for digital forensics and is a court-proven solution built for deep-level digital forensic investigation, powerful processing and integrated investigation workflows with flexible reporting options. It is built with a deep understanding of the digital investigation lifecycle and the importance of maintaining evidence integrity. EnCase Forensic empowers any examiner to seamlessly complete any investigation, even those involving mobile devices.

Reliable acquisition of evidence

With EnCase Forensic, examiners can be confident the integrity of the evidence will not be compromised. All evidence captured with EnCase Forensic is stored in the court-accepted EnCase evidence file formats.

Deep forensic analysis

EnCase Forensic has been used in thousands of court cases and is known for its ability to uncover evidence that may go unnoticed if analyzed with other solutions.

"To collect anything for forensic matters, cybersecurity matters or eDiscovery matters or investigations, it's always going to be OpenText EnCase. You know you're doing it right and you know every court is signed off on it. You can go to bed and feel comfortable about that."

Susan Jackson
Legal Counsel
Novelis

Mobile collection for 27,000+ profiles

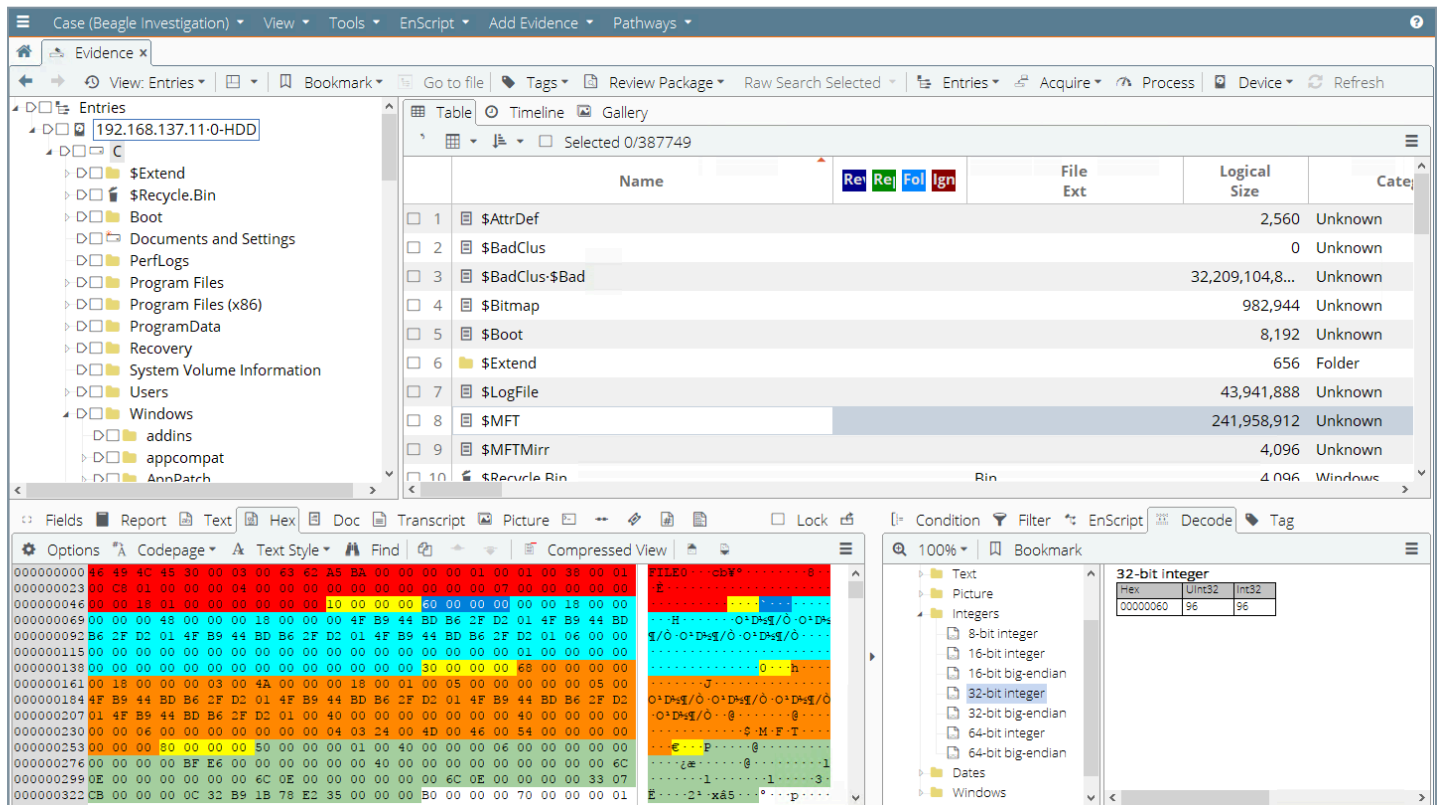

EnCase Forensic supports the latest smartphones and tablets, including more than 27,000 mobile device profiles, all while empowering the examiner to conduct logical and physical acquisitions. From the new investigator to the seasoned examiner, each level of user can find the evidence they need with mobile acquisitions in EnCase Forensic.

Broad OS/decryption support

Offering the broadest support of operating and file systems, artifacts and encryption types, EnCase Forensic enables the investigator to provide conclusive results with a detailed analysis of findings.

OpenText offers a wide variety of professional training programs and certifications to help develop expertise in EnCase software and forensic security.

EnCase Forensic has been named the Best Computer Forensic Solution eight years in a row by SC Magazine for its speed, flexibility and functionality. No other solution offers the same level of functionality, flexibility or track record of court acceptance. New customer-driven enhancements further differentiate EnCase Forensic from all other forensic tools on the market. Updated encryption support, Apple® File System support and volume shadow capabilities are just some of the new features designed for investigators to collect the evidence they need, efficiently and precisely. Additionally, EnCase Forensic has an enhanced indexing engine that can process data quickly, helping organizations and government agencies save costs by resolving incidents faster than ever.

Encase Forensic acquires data from a wide variety of devices, completes a forensically sound investigation and produces extensive reports.

OpenText EnCase Forensic features

Enhanced indexing engine	Empowers investigators to conduct investigations with powerful processing speeds, advanced index searching, comprehensive language support and optimized performance
Easy reporting	Provides customizable templates to help examiners create compelling, easy to read, professional reports that can be shared for every case
Extensibility	Offers extensibility through EnScripts, which are automated code commands that streamline and automate tasks and extend the capabilities of EnCase Forensic to help the examiners complete investigations more efficiently
Workflow automation	Delivers automated investigation workflows so examiners can easily navigate through EnCase Forensic to enhance how they uncover evidence
Updated encryption support	Provides encryption support for Microsoft® Windows® 10 Bitlocker XTS-AES, Dell® Data Protection 8.17 and Symantec™ PGP v10.3; investigators can acquire encrypted evidence without worry about data corruption, damage or unnecessary delays
Apple File System (APFS) support	Supports APFS, the file system used in the Apple High Sierra operating system (macOS® 10.13), helping investigators conduct targeted data collections from APFS and send the output as an EnCase logical evidence file
Volume shadow copy capabilities	Examines Volume Shadow Snapshot (VSS) backups, also known as volume shadow copies, generated by Microsoft Windows, allowing investigators to recover deleted or modified files, as well as full volumes and learn what may have taken place on a system before the investigation
