

Streamline record management and accelerate processes

Efficiently locate and share patient information.

Nuance Clintegrity Record Management accelerates processes for health management directors and managers who are responsible for the timely completion, tracking, and sharing of patient records across the health system. The records management suite provides a centralized, secure, and web-based patient record platform that efficiently locates patient records, shares them among medical staff, and meets release-of-information requirements. Nuance Clintegrity Record Management helps achieve efficiency gains for the entire health system, as well as accurate, complete records that can be shared with confidence.

Solutions to improve record management

Nuance Clintegrity Record Management is a comprehensive, integrated solution that offers the ability to monitor deficiencies, track patient records, and share information while remaining compliant with The Joint Commission, HIPAA and other regulations.

Nuance Clintegrity Chart Completion automatically tracks medical record documentation deficiencies and highlights who is responsible for providing missing information. The software works with dictation, transcription, and electronic signature systems to provide efficient access to patient records.

- **Improves** communication and issue resolution by facilitating communication regarding the status of incomplete records
- **Increases** staff productivity by enabling documentation deficiencies to be automatically updated and completed

Nuance Clintegrity Chart Locator uses an intuitive interface that staff can use to track the location of paper records, schedule chart delivery, and reserve charts required for patient appointments. For greater convenience, charts can be tracked on-the-go using the PDA to scan bar codes. This safeguards patient confidentiality and helps ensure HIPAA compliance in part by using record management tools that flag and restrict access to sensitive records.

- **Improves** patient record location tracking
- **Streamlines** record check-in, check-out, and re-filling
- **Facilitates** service performance analysis with reliable, centralized record tracking

Key benefits

- Improves staff efficiency and reduces response times
 - Streamlines the release of information
 - Improves patient record location tracking
 - Facilitates Service Performance Analysis
 - Ensures compliance with Joint Commission and other compliance standards
 - Facilitates HIPAA Accounting of Disclosure requirements
-

Nuance Clintegrity Correspondence Management automates the release of information and disclosure accounting processes for paper, hybrid, and electronic patient records. It allows record management staff to easily track requests for copies and automatically calculates any related fees. These features streamline workflow and disclosure entry, while minimizing entry mistakes and improving both internal and external communications.

- **Facilitates** HIPAA accounting
- **Minimizes** staff training and retaining costs
- **Streamlines** release of information

Nuance Clintegrity Electronic Document Management (EDM) enhances patient safety by providing immediate and concurrent access to active and historical patient information. It provides role-based access to a secure and comprehensive collection of patients' legal medical records categorized by episode, all in one convenient, web-based solution.

- **Enables easy management** and document tracking throughout a facility
- **Provides a single access point** and facilitates advanced reporting and data analysis
- **Improves customer satisfaction** by delivering faster and easier access to information

Nuance Clintegrity eSignature allows staff to review and electronically authenticate documents from any workstation when used in conjunction with Nuance EDM and Nuance Chart Completion.

- **Reduces** medical record completion time
- **Improves** access to patient information
- **Streamlines** the deficiency analysis process

Nuance Clintegrity File Manager uses customized indexing based on a health system's specific needs for quick and easier access to business records.

- **Provides anywhere, anytime access** to all enterprise documentation
- **Decreases** unprocessed paper filing backlogs

Nuance Clintegrity Record Management works with the award-winning Nuance Clintegrity Coding Solution, a web-based, enterprise-wide suite of products designed to improve coder productivity and maintain the highest levels of accuracy and compliance. These solutions efficiently manage and monitor the compliance coding challenges that can put a health system at risk and delay and reduce reimbursements. The Nuance Clintegrity Coding Solution brings together all the tools needed to completely and accurately review, analyze, code, and audit inpatient and outpatient encounters, manage the workflow better, and enhance coder productivity.
