Print Management & Cost Recovery

The only *true* Single Sign-On solution for your MFP
An evolutionary leap in managing & controlling your print and copy costs

drivve

drivve | print

Drivve | Print is a powerful print management and cost recovery solution designed for the needs of today's office and mobile workforce. At its heart lies an enterprise output management engine designed to manage thousands of printers and MFPs, yet it is easy to install and configure, and helps both large and small organizations manage, control and reduce their print and copy costs.

Reduced Costs

- Eliminates waste caused by unnecessary printing
- Controls access to color printing & copying
- Lowers IT support costs through efficient fleet management
- No need for ID card readers for secure print release
- Helps recover costs for print, copy, scan and fax

Security

- Fully encrypted Single Sign-On for all print & scan workflows
- Forces user authentication in order to print, copy, scan & fax
- Ensures the privacy and confidentiality of all documents
- Encrypts print jobs from the Drivve | Print server to the MFP
- Designed for High Availability

Staff Productivity

- Provides access to print jobs on any device at any location
- Reduces IT administration for the print and copier fleet
- Automatically assigns usage to cost centers or accounts
- Detailed management reports on all aspects of MFP usage
- Install in minutes, deploy in seconds…

Business Efficiency

- Automatically allocate costs for print & copy usage
- Introduce, update and enforce print policies
- Consolidate Windows, Novell and UNIX print servers
- Optimize network bandwidth, especially at remote locations
- Easily integrates into existing billing & reporting systems

Mobility

- Print documents from any mobile device to any print device
- Driverless printing allows user to print from anywhere
- Release print jobs from smartphones and tablets
- Easily provide hospitality & guest printing facilities
- Access your print jobs anytime and on the road

Usability

- Single point of control, accessible from any web browser
- Works with any networked printer or MFP
- Quick install with auto-detect and setup of printers & MFPs
- Manages & controls printing from Windows, Mac, UNIX, Linux & Mainframe environments

Mobility Manager

- Print via email, web upload or print app
- Supports over 500 document formats
- Apps for iOS, Android & BlackBerry smartphones & tablets
- Release jobs at any printer or MFP using the Drivve app
- Connects to cost-recovery solutions like Equitrac & PaperCut

Pull Printing

- Embedded app for leading MFP brands
- View and release print jobs on the device's user interface
- Easily allocate costs to projects, departments or clients
- Displays QR-code on MFPs for print app release
- Supports delegate printing & self-registration

Device Authentication

- Provides secure Single Sign-On (SSO)
- Encrypts both User ID & Password when authenticating users
- Controls access to device services – print, copy, scan & fax
- QR-code, ID card, AD/LDAP, and PIN/Shortcode authentication
- Supports various ID cards (HID, magnetic strip, MIFARE, etc.)

Usage Tracking & Reporting

- Comprehensive report templates for MFP usage & Cost Recovery
- Easy to use report scheduler
- Comprehensive pricing models for charging & billing
- Export data in CSV, XML or Microsoft Excel formats
- Easily customize & create new reports

The Complete Drivve Ecosystem
