MONOCHROME MULTIFUNCTIONALS FOR A4 FORMAT

With their long-life components, ECOSYS devices are designed to maximise durability and minimise both direct costs such as consumables, and indirect costs such as maintenance and administration. The cartridge-free system requires that only the toner has to be replaced regularly. The modular design concept allows you to add productivity-enhancing options and a wide-variety of paper-handling capabilities as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

PREScribe IIe

With PREScribe IIe, Kyocera's page design and control language, even complex graphics, logos and multipart forms can be created independently on a computer and stored in the printer. They can be recalled from the printer's memory as needed, reducing network congestion.

The KM NetViewer

KM Net Viewer enables complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunctionals from any Windows® PC and thus provides ideal network administration. It also supports other devices using the SNMP protocol.

Status Monitor and Command Center

The Status Monitor shows a printer's current condition and gives direct access to the web-based Command Center for the configuration of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode and blocking of access to the control panel).

USB Host Interface for USB Flash Memory

PDF files can be printed directly from USB Flash Memory (e.g. a USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.
