

Alaris Info Input Express

Web-based capture to speed your information processes

Scan, Capture, Index, Convert, and Submit Documents From Anywhere

Alaris Info Input Express is the easy, intuitive, web-based capture solution that speeds the scanning and capture process. It powers mobile capture, indexing, conversion, and submission of documents to desktop or business systems. Documents and data are consistently captured and delivered to the right locations through indexing. With Info Input Express, simplicity is the key to efficient productivity.

Capture anywhere to pump up your productivity

To be productive, you need information to drive your organization faster and further. To get that information into your systems and to the right people quickly, you need Info Input Express. Capture on the go with our app for **Android** and **iOS** smart phones and devices. Then send documents quickly to a variety of business applications.

To enhance productivity even more, use Optical Character Recognition (OCR) for easy data extraction, and benefit from more features -

- Populate data fields automatically for faster form filling and fewer manual errors
- Complete indexing at multiple remote locations or a single site
- Use historical-assisted indexing data as suggested indexing terms for consistency and faster future access
- Take advantage of patch code separator sheets to automate job switching and profiles through the Intelligent Job Select function

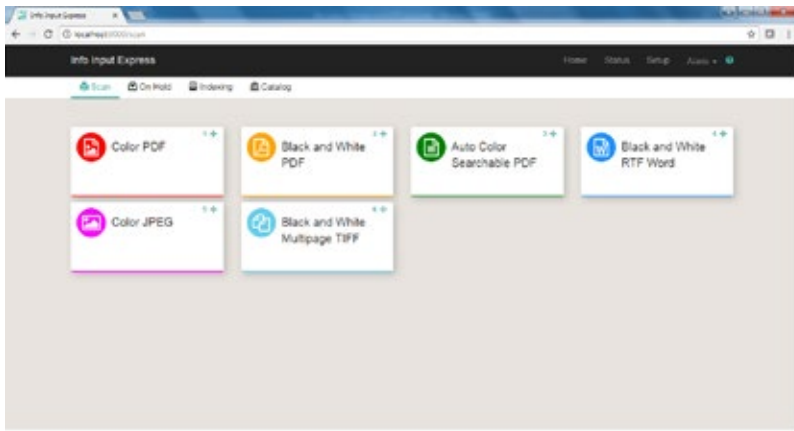

Info Input Express also works seamlessly with **TWAIN**-compliant scanners and MFP web browsers.

Validation and security you can rely on everywhere

Ensure data quality at the point of capture through a reliable approach combining smarter hardware and software technologies. For example, our Intelligent Exception Processing offers immediate validation of forms, so any missing information can be identified and fixed at the point of transaction.

Info Input Express also maintains the tight controls necessary for proper business regulation, protecting your information and ever-changing compliance needs. You'll have the peace of mind and reliability that's mandatory for mission- and time-critical applications. Plus, you'll know that data security is maintained through all aspects of mobile capture.

Find any document quickly and easily with the catalog function.

Ultra-efficient capture and deployment

Be smartly efficient with features such as Intelligent Barcode Reading that produces the most accurate data extraction results while taking complexity out of the setup process.

Scan directly into workflows (based on different fields, document types, and scan jobs) at the touch of a button with our Smart Touch functionality (when you use scanners from Alaris) and share to various departments and remote sites.

Stop wasting time searching for specific documents with our catalog function.

- Record the exact document location and associated indexed data
- Ensure a clear chain of custody
- Get fast access to every document and reduce operator frustration

Info Input Express is easy to deploy and reduces installation and maintenance costs through streamlined, centralized administration and use of your existing infrastructure.

- Achieve valuable consistency in job setup and configuration
- Manage workflow and output across your capture solution - no matter what platform or device is used
- Send out updates and information to all users at once
- Enforce policies and upgrades consistently across your organization

Simple design for the way you work today

Info Input Express is simple to install, use, and support. To fit today's work style, users can easily initiate key tasks - such as scanning to a specific folder - with just one click. Administrators can also configure the software to only allow access to certain tasks for individual users.

- Simplicity means training requirements are minimal
- Easy to set up using your existing infrastructure
- No desktop software needed

Info Input Express works with all scanners so - even if you have hardware from various manufacturers - your organization can benefit today and as your operations and locations expand. Connect with a great many business output destinations, including -

- **Box**
- **Dropbox**
- **Salesforce**
- **OneDrive**
- **Google Drive**
- **SharePoint**
- **SharePoint Online** and others

Scale up for even more productivity

Info Input Express Limited Edition comes bundled with Alaris S2000 Series Scanners. Upgrade to Info Input Express Network Edition for additional features to be even more productive.
