

PN-H801 4K Ultra-HD LED Monitor

A 4K Ultra-HD Display that will Take Your Breath Away

Conveying Dynamic Images with Accurate Color Reproduction

The 80" Class (80" diagonal) PN-H801 display commands attention. This mighty 4K Ultra-HD display features an LED backlight with an expanded color gamut that supports a wide range of colors. Whatever the indoor venue, this dynamic display works tirelessly to reach your target audience, conveying your message with larger-than-life realism and an incredibly precise expression of color and detail.

Stunning 4K Ultra-HD Image Quality

The PN-H801 display is a communication platform with a huge presence. Sized for eye-grabbing impact, this 80" (80" diagonal) Class 4K Ultra-HD monitor boasts an impressive level of image quality that allows it to showcase all manner of content, from detailed text to beautifully textured graphics. With four times the pixel resolution of full HD, the PN-H801 display delivers all the detail, depth and clarity that the content creator intended. Excelling in any indoor venue-for example, in a retail setting, meeting room, or control center-this is one monitor that supports precise communications with any audience.

4K Ultra-HD Reveals the Finest Details

Despite the massive scale of the PN-H801 display, onscreen content is rendered in superbly detailed ultra-high definition. With videos and photos displayed at up to 4K Ultra-HD, you get to see subtle textures and fine details not visible at full HD resolution. The high pixel count means there's no need to worry about jaggies, even on such a large screen.

Outstanding Color Reproduction

The PN-H801 display boasts an LED backlight that supports a wide color gamut. This combines with the panel's advanced picture quality adjustment features to deliver rich, vivid images with greater realism. Compared to a conventional full HD model*, the PN-H801 display has an approximately 20 percent larger sRGB color gamut range (area ratio). You'll see a wider range of color, especially captivating reds and greens. * The Sharp PN-E802 display.

An Ever-Ready 4K Ultra-HD Display

4K Ultra-HD Upscaling and Offset Function

The PN-H801 is equipped with an advanced upscaling engine that upscales standard full HD content into 4K images, in real-time. An offset function minimizes blurriness and jaggies to make expanded images smoother than with standard upscaling.

4K Ultra-HD Transfer at 60 fps via Single Cable

The PN-H801 display supports the features defined in the HDMI™ input specification, which enable stunning 4K Ultra-HD 60p video signals to be transmitted conveniently over a single cable. The monitor features four HDMI inputs that enable easy switching between multiple sources.

USB Media Player for PC-Less Playback

The PN-H801 can be set up to play slideshows and videos without the need for a PC. A built-in USB media player allows playback of 4K Ultra-HD photos*1, full HD videos, and music stored on a connected USB memory device*2. Photos can also be saved to and played from the PN-H801 display's internal memory. For added security, the PN-H801 display comes with a USB drive cover to prevent theft of the data storage device. The media player's auto play function enables photos and videos to be played automatically.

Supported media formats: JPEG for photos; MP4, M2TS, 3GP, and MOV for videos; and WAV, WMA, M4A, and MP3 for music.

^{*1} Supports input of &K-equivalo...,
*2 USB storage device sold separately Supports input of 8K-equivalent photos (displayed at 4K)

Stable and Reliable Professional Operation

Choice of Installation Mode

The PN-H801 display offers a choice of landscape or portrait installation, allowing you to select the mode that best suits your display content and application. While portrait installation offers the look and impact of a poster, landscape installation puts wide images on vivid display. Portrait installation of this nearly six-foot-high monitor allows you to showcase life-size images of people.

24/7 Operation

Designed for around-the-clock use and rugged operating conditions, the PN-H801 display is a reliable and commanding presence in demanding 24-hour professional applications. Even after long hours of continuous operation, this monitor delivers a sharp, clear picture. The PN-H801 display excels in public spaces such as commercial facilities, stations and airports, as well as in monitoring rooms.

Note: If a static image is displayed continuously for an extended period, image persistence may result. This can be removed gradually by displaying a video or moving graphics.

LAN/RS-232C Control

Thanks to its LAN/RS-232C interface, the PN-H801 display can be easily controlled and monitored from a central location via a PC. Content can be conveniently distributed using optionally available Sharp Digital Signage Software (SDSS).

Note: Functions that can be controlled via LAN/RS-232C are limited. Some systems require an individual PC to control each monitor.

Impressive Design and Easy Installation

Stylish Design

The PN-H801 display boasts an ultra-slim bezel that measures just 16 mm on the right, left-, and top, and 21 mm on the bottom. The elegant and understated bezel helps the display to blend in naturally with its surroundings.

Built-In Speakers

Built-in speakers eliminate the need for external speakers and keep the PN-H801 display stylishly streamlined.

Lightweight and Easy to Install

The PN-H801 monitor weighs only 119 lbs, which makes for easy placement. To help ensure safe handling of a PN-H801 monitor, all four of its corners are fitted with robust carrying handles. Together with the monitor's light weight, these handles help enable safe transport and easy, time-saving installation.

A Wide Range of Professional Applications

^{*1} Brightness depends on input mode and other picture settings. Brightness level will decrease slightly over the lifetime of the product. Due to the physical limitations of the equipment, it is not possible to maintain a precisely constant level of brightness.
*2 When installing the monitor in the portrait orientation, and the internal temperature of the monitor rises excessively, the brightness of the backlight automatically decreases in order to prevent a further temperature rise. *3 Use a commercially available connection cable for PC and other video connections. *4 Requires the bundled RS-232C conversion cable. *5 Only for command control. *6 Supported media formats: JPEG for photos; MP4, M2TS, 3GP, and MOV for videos; and WAV, WMA, M4A, and MP3 for music. *7 Use a 3-pin compatible power outlet.

Note: USB storage device sold separately. Max. size of USB device (incl. terminal) usable with drive cover: 2" x 3/4" x 1/2" (L x W x H).

Dimensions

Units: inch (mm)

- * Screen dimensions
- * To use the VESA-standard mounting bracket, use M6 screws that are 8 to 10 mm plus the thickness of the bracket.
